COOLING IN DATA CENTERS

Air management inside the data room is complex and a key factor for the energy efficiency of the data center. Know the typical problems like recirculation and bypass, how they add risk to the operation and how to treat them are topics fundamental to obtain the best of refrigeration systems.

TECHNICAL SEMINAR

February 15th 2024

Time: 17:00-20:00

Semeli Hotel, Nicosia

Opening Seminar by

Professor Alexandre Kontoyanis, Specialist in Data Center Design and Operations by DCD and **ASHRAE'S Brazil Chapter President** as well as the Corresponding member of the Technical Committee TC 9.9 (Mission Critical Facilities, Data Centers, Technology Spaces and Electronic Equipment) since 2019 .

TOPICS

EFFICIENCY IN DATA CENTRE'S COOLING SYSTEM – HOW TO?

LIQUID COOLING – LATEST DEVELOPMENTS

MAIN SPONSOR

UNDER THE AUSPICES
