About CyFFORS

CyFFORS developed and established a prototype flood forecasting system for Cyprus by exploiting the state-of-the-art WRF (Weather Research and Forecasting) hydrometeorological modeling tool. CyFFORS has received funding from the Republic of Cyprus and the European Regional Development Fund through the DIDAKTOR' RESTART 2016-2020 Program for Research, Technological Development and Innovation. The project is a collaboration between Frederick Research Center and the National Observatory of Athens.

17:00 – 17:05

Welcoming

Dr. Haris Haralambous

Associate Professor, Frederick University
Researcher, Frederick Research Center

17:05 – 17:15

Cyprus Ionospheric Research Group activity

Dr. Haris Haralambous

Associate Professor, Frederick University
Researcher, Frederick Research Center

17:15 – 17:30

Cyprus Flood Forecasting System - CyFFORS project and future perspectives

Dr. Christina Oikonomou

Research Associate, Frederick Research Center

17:30 – 18:00

CyFFORS project results and service demonstration

Dr. Christos Giannaros

Post-doc Researcher, Frederick Research Center

18:00 – 18:15

An outlook of the 2021 summer in the Eastern Mediterranean

Dr. Kostas Lagouvardos

Research Director, National Observatory of Athens

18:15 – 18:30

Coffee Break

18:30 – 19:00

"Climate change happening now?"

Documentary screening at Frederick University
'Stathmos' Cultural Center

19:00 – 19:30

"The Sun and Us" space weather exhibition

Guided tour and open discussion at Frederick University
'Stathmos' Cultural Center
